INTEGRATED MANUFACTURING SERVICE

Manufacturing Technology

- Manufacturing Execution System (MES)
- Automation System Integration
- Robotic Automation System

Introduction

The Manufacturing Technology Division is the core pillar of CNCTech Group, built on over 18 years of experience in advanced manufacturing and precision engineering. It delivers integrated manufacturing services and production-optimized solutions, enabling customers to move seamlessly from product concept and engineering validation to mass production final assembly.

Guided by the vision to become a globally competitive manufacturing group from Vietnam, the division plays a key role in positioning CNCTech within high-value supply chains. Its mission is to advance Vietnam's manufacturing capabilities through technology leadership, precision engineering excellence, and high-performance integrated solutions for global customers.

Driven by the principles of Integrity, Quality, and Delivery, the division ensures ethical business practices, consistent quality through continuous improvement, and reliable on-time delivery. As the engine of CNCTech Group, it is committed to elevating the "Made in Vietnam" brand and becoming a trusted long-term manufacturing partner worldwide.

Milestones

2008 - 2015 — **Startup journey from a CAM workshop to an integrated manufacturing platform.**

- **2008** — Founded as a CAM workshop
- **2010** — Opened first precision machining facility in Binh Duong
- **2013** — Established joint venture with a Japanese partner in precision machining
- **2015** — Opened tooling & molding and precision machining facility in Hanoi

2016 - 2021 — **Expanded investments and M&A with companies in automation, oil & gas, and electronics, gradually building a more integrated manufacturing ecosystem.**

- **2018**
  - Completed M&A with VKX (EMS sector)
  - Invested in VINAM Oil Tools and SMCTech
- **2019**
  - Established Saigon factory
  - Invested in Skylight, Mentech, Vineco, and CNC Vina.
  - Acquired Framas Bac Ninh
- **2021** — Relocated headquarters and main production to CNCTech Thang Long

2022 - 2025 — **Continued to scale up, investing in technical excellence and management capabilities, positioning the Group for global growth.**

- **2024**
  - Launched integrated manufacturing services
  - Initiated global market expansion
  - Expanded manufacturing capacity
- **2025**
  - Completed M&A with ASV (Automation Equipment and Precision Engineering Trading Company)
  - Expanded into global markets through strategic exhibitions and partnerships (US, EU, Asia)
  - Strengthened partnerships in semiconductor and high-tech industries
  - Advanced quality systems toward international standards (AS9100 readiness)

2026 - 2030 — **Further scaling up, focusing on investment to become a tier-2 and tier-3 supplier to machinery manufacturers in the semiconductor, automotive, medical device, and aerospace industries.**

Vision

To be a globally competitive industrial manufacturing group from Vietnam, positioned at the core of high-value supply chains in precision engineering and supporting industries.

Mission

To drive the advancement of Vietnam's advanced manufacturing sector through technology leadership, precision engineering excellence, and integrated, high-performance solutions for global industrial partners.

ESG Commitment

At CNCTech Group, we are committed to responsible and sustainable manufacturing practices that create long-term value for our customers, employees, and communities.

Environment

We strive to minimize our environmental impact by optimizing resource efficiency, reducing waste, and implementing environmentally responsible processes across our operations. We support the use of compliant materials and surface treatments aligned with global standards such as RoHS and REACH.

Social

We foster a safe, inclusive, and professional working environment for our employees, while continuously developing skills and capabilities. We build long-term partnerships with customers and stakeholders based on trust, collaboration, and mutual growth.

Governance

We operate with integrity, transparency, and accountability in all business activities. Our management systems and processes are aligned with international standards to ensure consistent quality, compliance, and ethical practices.

Business Philosophy

INTEGRITY

Upholding the highest and most stringent standards through a transparent commitment to ethical business practices.

QUALITY

Delivering consistent excellence through continuous improvement and precision.

DELIVERY

We ensure reliable, on-time delivery with precision and consistency in every project.

Manufacturing Capacity

- **60,000+sqm** — 08 factories
- **2000+** — Employees
- **400+** — Machining centers
- **500+** — Integrated Systems/ year
- **80+** — Molding presses
- **300+** — Molds/ year

Integrated Manufacturing Service from Vietnam

Board of Directors

Mr. Nguyen Van Hung

Founder & President

Founder and Chairman of CNCTech from 2008 to present. As a decisive leader with a deep understanding of the technology industry and industrial infrastructure, and with the belief that 'nothing is impossible', he always leads CNCTech forward, never wavering in the face of difficulties and challenges.

- Founder, Chairman of the Board of Directors, General Director
- Executive President

- Third-class Labor Medal in 2023
- Top 10 Red Star Entrepreneurs of Vietnam in 2022
- Top 60 Outstanding Entrepreneurs in 2022
- Top 13 typical entrepreneurs of Vinh Phuc province in 2022
- Prime Minister's Certificate of Merit in 2019

- Chairman of Vietnam Investment & Startup Club
- Member of Red Star Entrepreneur Club
- Member of the Central Committee of Vietnam Young Entrepreneurs Association
- Member of the Executive Committee of Hanoi Young Business Association
- Chairman of Phu Tho Provincial Business Association
- Provincial People's Council Member of Phu Tho

Makino	24	21		2	1		
Brother	9	5					
Other	226	52	30	5	13	35	91

Materials

ASTM, JIS, DIN, GB. All common engineering-grade metals and plastics are available:

- Metals: Aluminum, Titanium, Brass, Stainless Steel, Steel, Alloys, Inconel
- Plastics: ABS, PC, PMMA, PEEK, PTFE (Teflon), POM (Delrin), PA (Nylon)

We also maintain a solid partnership with selected local suppliers for preformed materials, including:

- Aluminum die casting (toolings from us)
- Aluminum extrusion profile
- Stainless steel or aluminum investment casting (lost-wax casting)
- Gravity casting, sand casting

Sizes & Tolerances

- Vertical milling envelope: **4,200 x 2,700 x 1000 mm (165 x 106 x 39 in)**
- Horizontal milling envelope: **800 x 750 x 850 mm (31.5 x 29.5 x 33.5 in)**
- Turning sizes: **D481 * L1,275 mm (D18.9 * L50 in)**
- Tolerances: standard level **0.02 to 0.10 mm (0.001 to 0.004 in)**. We can keep a smallest tolerance of **0.002 to 0.005 mm (0.00008 to 0.0002 in)**. For certain applications like mold inserts, we can keep a tolerance of **0.005 mm (0.0002 in)**.

Processes

1. Engineering & DFM Review
- Drawing review
- Design & tolerance alignment with customer
- CNC Programming

2. Material
- Casting, lost-wax, forging, extrusion
- Rough CNC Machining
- Heat Treatment

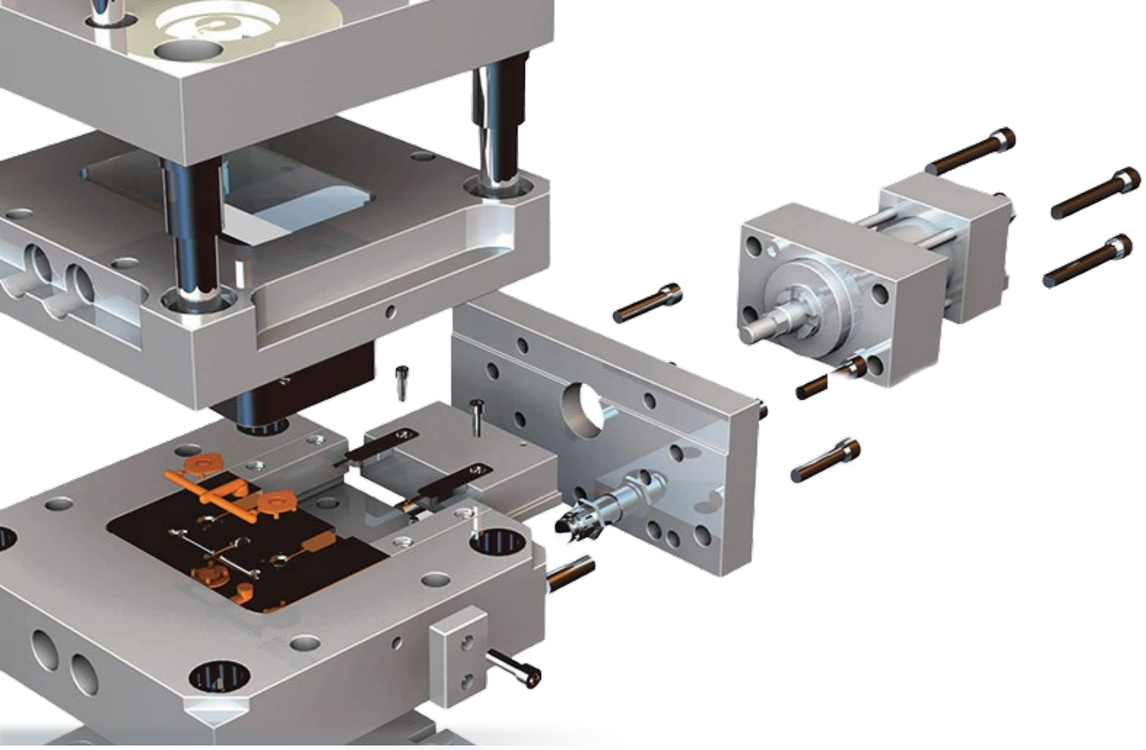

3. Precision Machining
- CNC Finishing
- EDM
- Wire-cutting
- Deburring & Surface finishing

4. Surface Treatment
- Anodizing / Hard Anodizing
- Coating (Chemical Conversion Coating, Powder Coating, Spray Painting)
- Plating (Nickel Plating, Galvanizing, Black Oxide)

5. Quality Control
- In-Process Control (SPC / IPQC)
- Final Inspection (OQC)
- Protective Packaging
- On-Time Delivery

6. After-Sales Service
- Warranty
- Technical Support

TOOLING & MOLD FABRICATION

Processes

Materials & Standards

CNCTech fabricates plastic molds and die casting tools for Motorcycles, Network Equipment, Electronic Appliances and IoT Devices. We also welcome repairs and engineering changes on your existing tools.

- Tool materials: P20, HPM7, PAC500, FDAC, SS420, NAK80, Nimax, SKD61, S-Star, Stavax, Beryllium Copper, W360(1.2355-S7), DHA-W(1.2344-H13), and sometimes A7075.
- Mold base from Kishin (Futaba), LKM or import.
- Standard components from PCS, DME, Progressive, Misumi, Punch, or import (DME).
- Hot runners from Mold Master, Oerlikon, Yudo, Progressive, PCS, Husky or import.
- Texturing to Nihon Etching or VDI Standards
- Surface Treatment: Nitride, TiN, TiCN
- Heat Treatment: Oil, Vacuum

Mold Sizes & Features

- Plastic injection molds for up to **1200-ton press.**
- Die casting tools for up to **800-ton press** (tryout in our partners' shops).
- Insert molds, over-molding tools.
- Reverse ejection molds for cosmetic covers.
- Mirror polished molds for turn signal light, taillight, and odometer.
- Family molds for low volume projects

Capacity

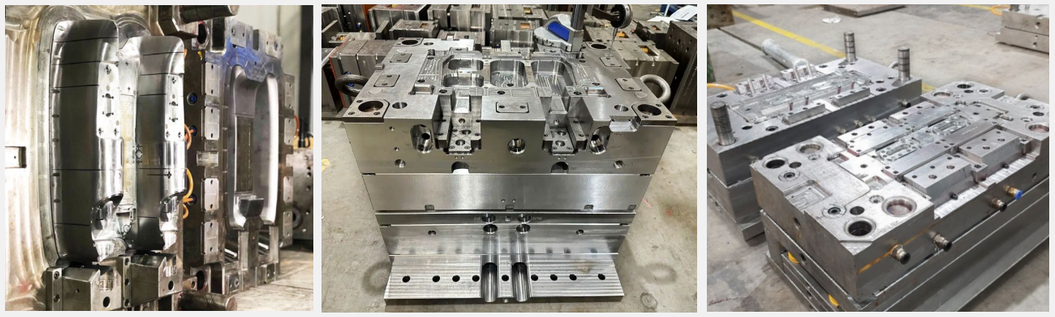

Factory

CNCTechThangLong

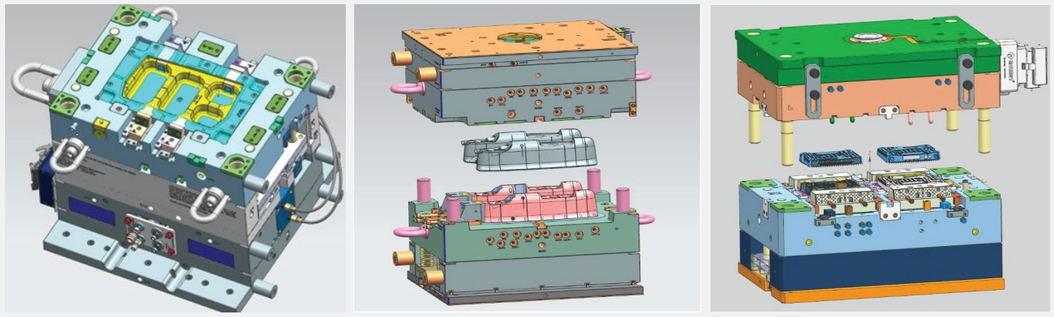

CNCTech SaiGon (new factory in 2026)

Mold Size	**80 -1200 ton**
Capacity / month	**30**
Avg. Leadtime	**40 days**

Produced Mold

3D Mold Design

Machine Capacity & Part Sizes

- Part weight up to around **3,000 g (100 oz)**
- Part tolerance: as low as **0.01 mm (0.0005 in)**
- Press capacity from **80 to 700 metric tons**

Value-Added Services

- Threaded inserts installation (ultrasonic or thermal)
- Machining (routing)
- Silk printing and pad printing
- Protective film application
- Assembly and packaging
- Spray painting and plating

CNCTech offers injection molding service and specializes Home Appliances, IoT Devices, and other OEM Applications.
We run 120 presses with capacities from 80 to 700 tons in Northern and Southern facilities.
Our shops routinely handle technical grade resins including PEEK, ABS, PP, ASA, HIPS, PC, PBT, PMMA, PA, POM, and TPEE. The granules often come with flame retardant additives, and sometimes, reinforcement fibers.
A **two-color injection** molding machine enables **multi-material parts** with enhanced aesthetics and performance in a single molding cycle.

SMCTECH

Sheet Metal Fabrication - Machine Frame Manufacturing - Surface Treatment

Factory No.3, Ba Thien IP - Section 1, Binh Tuyen Commune, Phu Tho Province, Viet Nam

SMCTech is a Vietnamese manufacturing company founded in 2018 and located in Phu Tho province. Established to meet the rising demand for precision metal fabrication, the company has rapidly expanded its capabilities and workforce.

The 8,000-square-meter factory is equipped with advanced machinery for laser cutting, CNC punching, bending, and welding. In addition, SMCTech offers in-house surface treatment services, including powder coating, liquid painting, and anodizing.

With a strong commitment to quality and efficiency, SMCTech serves customers in the automation, electronics, and semiconductor industries

asiav.com.vn

ASV INDUSTRY ., JSC

ASV Industry JSC was established in 2013. With non-stop development activities in the field of industrial equipment - machinery, for many years, ASV has been providing products, outstanding as well as optimal solutions to each customer in particular and the entire industry in general. What we care about is customer satisfaction.

ASV INDUSTRY

Manufacturing Equipment

Lot F1-2-3, Thang Long Vinh Phuc IP, Binh Nguyen Commune, Phu Tho Province, Vietnam

Product Category

Cutting Tools

Indexable Mills - Endmills - Turning -
Drill, Reamers, Tapping - Tools Holder

Machinery & Equipment

Metalworking Coolant & Industrial Oil

Measurement Tools

Automation

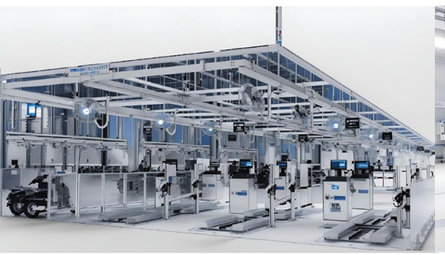

CNC VINA

Precision Machining - Automation Machinery

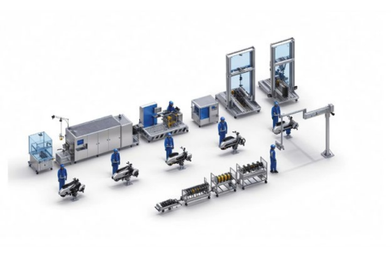

Song Cung IZ, Dan Phuong, Hanoi, Vietnam

CNC Vina is a leading company in Vietnam specializing in automation solutions and custom machine manufacturing. Established in 2007, the company designs and manufacture of automatic, production lines, robotic systems, conveyors, and specialized machinery for industries such as automotive, electronics, food, and beverages. With a team of experienced engineers and modern manufacturing capabilities, CNC Vina delivers comprehensive solutions from design to installation and maintenance.

VINECO

SMT & Electronics Manufacturing Service (EMS)

Ngoc Truc, Xuan Phuong Ward, Ha Noi, Vietnam

Vietnam Telecommunications Equipment Joint Stock Company (VINECO) is a joint venture between VNPT and NEC (Japan), established in 1997 in Hanoi. VINECO specializes in manufacturing and supplying digital switching systems, optical transmission equipment (Pasolink), IT and telecom services, as well as Samsung digital display solutions and EMS (PCB assembly) services. Certified with ISO 9001:2015, the company operates under the mission of “Continuous Improvement, Quality First.” VINECO has successfully deployed NEAX 61 exchanges for 17 provincial telecom centers and Pasolink systems for major networks such as Viettel, Mobifone, and VinaPhone. VINECO is recognized for its commitment to quality, innovation, and credibility in Vietnam’s telecom and IT sector.

Date code printing	PCB separator	Automatic lead cutter	Lead forming & cutting	Jumper wire forming & cutting

VIJA TECHNOLOGY

Precision Machining - Sheet Metal & Machine Frame Fabrication - Surface Treatment

B15 D4 Street, Group 20, Ward 2, Ho Chi Minh City, Vietnam

VIJA Technology JSC specializes in precision machining and metal coating, delivering optimized industrial solutions. Founded in 2012, the company operates a modern facility in Binh Duong with an area of 6,500 m² and a team of over 200 employees. VIJA offers a wide range of services, including CNC milling, CNC turning, wire EDM, welding, surface treatment, painting, assembly, and plasma cutting. Guided by the mission of building a “clean, friendly, and sustainable company,” VIJA is committed to delivering high-quality products that meet stringent technical standards.

VINAM OIL TOOLS

Precision Machining - Oil & Gas Industry Machining

Factory C_1B_C2, Lot C_1B_CN, Road C3, My Phuoc 3 Industrial Park, Thoi Hoa Ward, Ben Cat City, Binh Duong Province, Vietnam

Vinam Oil Tools (Vietnam American Oil Tools JSC) specializes in manufacturing and machining oil & gas equipment. With a modern plant in Binh Duong and over 30,000 CNC machining hours monthly, the company was founded in 2008 and joined CNCTech Group in 2018. Vinam is committed to delivering API-standard products with core values of credibility, consistency, competence, and reliability.

CNCTECH SAI GON

Precision Machining - Tooling & Mold Fabrication, Automation Machinery

Lot HT4-9, D16 Road, Saigon High-Tech Park, Tang Phu Nhon Ward,
Ho Chi Minh City, Vietnam

This factory is one step up for us, aiming at parts for aerospace and semiconductor. We are operating in a rented space of 3,300 Sq. Meters at Lot I-3B-1. CNCTech Saigon will move into its new building at 12,600 Sq. Meters once the construction at Lot HT 4-9 is completed.

From 2026 to 2027, we will invest 45 CNC machining centers included 5-axis machines for new factory of CNCTech Sai Gon

CNCNEXORA

No 1, Dai Mo Street, Dai Mo Ward, Hanoi, Vietnam

Build here. Scale Globally

The deep-tech innovation arm of CNCTech Group
bridging precision manufacturing with core technology ownership.

Semiconductor & IC Design

End-to-end ASIC design:
Analog, Mixed-Signal & RF nodes

Target industries:
Low altitude economy, Industrial IoT, Semiconductor Equipment

Key applications:
Motor Drivers, PMIC, RF Modules

FA Lab in development
-> targeting ISO/IEC 17025:2017 certification

Robotics & Autonomous Systems

In-house development of UUV/ROV and drone platforms

Control:
FMUv5X autopilot + proprietary RF transceiver IC

Frames:
Carbon fiber & anodized aluminum (CNCTech precision machining)

Software:
ROS2 / RTOS + AI-driven underwater navigation

High-Tech FDI Project Development

Role: Long-term technical development partner

University partnerships:
4+1 co-training model + Shared Lab

Value Package for investors:

- Prime industrial infrastructure
- Integrated local supply chain: machining, EMS, sheet metal
- On-site R&D support & product adaptation (first 6–12 months)
- Customized high-quality engineering talent pipeline

Investors served across:
Semiconductor; Medical Devices, Automation, phonics...

COMMUNITY

FOCUS ON EMPLOYEE

Childcare, catering, health and sport facilities

PUBLIC COMMITTMENT

Support education, healthcare, the elderly, environmental protection
